## Pacmaan<sup>®</sup> NA 620 Valve Stem Packing

All purpose, self forming PTFE valve stem packing

- A non-staining and non-contaminating packing for use in valve stems
- A low friction packing with a high degree of pliability enabling it to conform to valve stuffing box flaws and irregularities
- Excellent chemical resistance even against strong acids and caustics

*Easy to install, requiring minimum inventory*

<b>Service Media and Conditions</b>	Compatible in strong acid and alkali media, affected only by elemental fluorine and molten alkali metals
<b>Temperature</b>	-232°C to 315°C
<b>pH</b>	0 to 14
